## Experience

### QA Tester / QA Automation

Oct 2018 – Present

#### Designory – Chicago, IL

- Built a screenshot tool based on Puppeteer used to recall specific UI states and capture images for client websites.
- Collaborated with lead DevOps engineer to configure screenshot tool into GitLab CI to perform visual regression tests, and built a user interface that allowed non-technical team members to capture screenshots of a product site to submit for FDA certification.
- Wrote and managed a suite of UI / end to end tests using Nightwatch.js to ensure that pharma websites adhered to strict FDA guidelines.
- Resolved inefficiencies using Node.js scripts to automate internal project workflows with Jira, Confluence, Trello and Slack REST APIs.

### Front End Developer

Feb 2019 – Apr 2019

#### Designory – Chicago, IL

- Transformed design comps into responsive components, tracked and resolved issues in Jira for myplenity.com, a pharmaceutical product website.

### National Sales Assistant

Mar 2016 – Sep 2018

#### iHeartMedia – Chicago, IL

- Created and deployed a responsive, single-page employee directory web app, reducing the time required for iHeart Media employees to produce radio copy/traffic distribution lists by an average of 151%.

## Projects

### Full Stack Developer

2019 – Present

#### hmnymusic.com

- Ideated and built a music streaming application with React, Redux and Express that enables users to create playlists with songs from both Spotify and YouTube.

### Mentee

Sep 2017 – Nov 2017

#### ChiPy Mentorship Program – Chicago, IL

- Completed a one-on-one mentorship with a back end engineer focused on learning the basics of Python, OOP and Django.

## Education

University of Illinois at Urbana-Champaign  
Communication (B.A.), Business (Minor)  
Champaign, IL

2011 – 2015

## Skills

**JavaScript** - Node.js, Express, React, Redux

**Git** - GitHub, GitLab
